## PROFILE

Aspiring Full Stack Web Developer with hands-on experience in building responsive and scalable web applications using the MERN stack. Passionate about designing user-friendly interfaces and developing efficient backend systems. Dedicated to learning modern web technologies and applying them to solve real-world problems.

## TECHNICAL SKILLS

- Frontend: ReactJS, HTML5, CSS3, JavaScript (ES6+)
- Backend: Node.js, Express.js
- Database: MongoDB
- Version Control: Git & GitHub
- Other: RESTful APIs, JSON, Responsive Web Design

## PROJECT EXPERIENCE

### EcoCollect – MERN Stack Web App

- Developed a gamified e-waste management web app for National University students to encourage responsible e-waste disposal through a reward-based system.
- Built RESTful APIs with Express.js and MongoDB for submission tracking and analytics.
- Designed responsive React front-end integrated with JWT authentication and live data fetching.

### QuickRentPH – Peer-to-Peer Rental Platform

- Developed the backend system using Node.js and Express for a simulated item rental platform with escrow-style transaction logic.
- Designed secure CRUD operations for user and rental management using MongoDB.

## EDUCATION

National University Manila

Bachelor of Science in Information Technology – Specialization in Mobile & Web Applications

Expected Graduation: 2026
